KEY FEATURES

RESCUE TEAM

01 | HELMET-COMPATIBLE HOOD

with hidden, zipped gusset and storm collar. It adjusts to give a precise, close-to-the-face fit, with or without a helmet. Height and volume adjustment ensure good protection, visibility and mobility at all times. Soft internal stretch face gaiter for increased comfort.

02 | FREE MOTION PATTERNING

to prevent hem-lift while climbing.

03 | DEEP SIDE VENTILATION ZIP OPENINGS

to dump heat during periods of high exertion.

04 | HARNESS COMPATIBLE POCKETS

KEY FEATURES

RESCUE TEAM

05 | INSULATED, FIXED ADJUSTABLE HOOD
that can be adjusted to fit close to the face if required.

06 | ELASTICATED HEM ADJUSTMENT
with cord locks.

07 | ZIPPED SLEEVE POCKET
immediate access and safe storage for essential small tools during rescue work.

08 | LARGE INNER MESH POCKETS
for gloves, hat, ski skins, etc.

09 | NAME LABEL

26753 *RESCUE GTX PRO M JACKET

NOTES:

A waterproof and breathable shell jacket for men with a GORE-TEX® Pro membrane that offers full protection for professional mountain use.

Helmet-compatible hood with hidden, zipped gusset and storm collar. It adjusts to give a precise, close-to-the-face fit, with or without a helmet. Height and volume adjustment ensure good protection, visibility and mobility at all times. Soft internal stretch face gaiter for increased comfort. (01)

Free motion patterning to prevent hem-lift while climbing. (02)

Large inner mesh pockets for gloves, hat, ski skins, etc. (08)

Elasticated hem adjustment with cord locks. (06)

Zippered sleeve pocket for immediate access and safe storage for essential small tools during rescue work. (07)

Deep side ventilation zip openings to dump heat during periods of high exertion. (03)

1581 bergrot/0910

Made for professional use in the mountains, the Rescue GTX PRO Jacket is an outstanding 3-layer shell jacket with a waterproof and breathable GORE-TEX® Pro membrane. Designed specifically for alpine rescue work in all seasons, it has a fully-featured technical spec.

Developed together with the Tyrol and South Tyrol Mountain Rescue Team, it provides professional-grade protection and functionality for rescue operations and activities such as alpine mountaineering, ski mountaineering, glacier mountaineering and ice climbing. In addition, the Rescue GTX PRO Jacket also features SALEWA's free motion patterning to prevent hem-lift while climbing. We equip it with an extra-strong, higher denier version of GORE-TEX® Pro at the shoulders, elbows and lower hem to provide greater protection from ice screws, ice tools or other mountaineering equipment.

Functional features include: waterproof YKK zips ventilation zips and a full waterproof technical finish with welded seams (water column: 28,000 mm). Its durable and abrasion-resistant fabric offers reliable weather protection in extreme and unpredictable conditions. All pockets are positioned for easy access when wearing a harness or backpack.

A waterproof and breathable Powertex CORDURA® shell jacket for men that offers protection for professional mountain use.

Helmet-compatible hood with hidden, zipped gusset and storm collar. It adjusts to give a precise, close-to-the-face fit, with or without a helmet. Height and volume adjustment ensure good protection, visibility and mobility at all times. Preshaped protective visor. (01)

Large, easy-access chest pocket to store tools in rescue situations, also doubles up as a compression storage pouch.

Free motion patterning to prevent hem-lift while climbing. (02)

Elasticated hem adjustment with cord locks. (06)

Lightweight stretch cuffs to keep the wind out

1581 bergrot/0910

Designed as a lighter, durable, packable outer layer for 3-season mountain rescue use, the Rescue 2.5L PTX Shell Jacket offers waterproof, wind-proof and lightweight weather protection for rescue operations and alpine climbing and mountaineering. It was Developed together with the Rescue Team Tyrol.

Made of our proprietary 2.5 layer Powertex weather protection fabric with CORDURA® it offers the right combination of performance, weight and durability. CORDURA® yarns in the outer layer ensure improved abrasion-resistance in wide alpine cracks or chimneys. A DWR (Durable Water Repellent) finish coats the shell (water column: 10,000 mm). During intense activities, the breathable membrane transports vapour to the outside, maintaining a comfortable wear climate.

With a helmet-compatible storm hood (its gusset construction keeps it neat and compact when closed, yet larger with 10% more volume and freedom of movement when open) plus high, integrated collar and single rear-hand adjustment, ergonomic sleeves and free motion patterning for freedom of movement and zero hem lift on exposed faces. Its spacious chest pocket provides plenty of storage room for smaller tools. A full-length internal wind baffle behind the zip and elasticated cuffs and hem all help to block out cold gusts. It also packs down small in its own compression pouch. All pockets are positioned for easy access when wearing a harness or backpack.

Main Material
PXE 10K/10K Cordura 2.5L 108 (100%PA)

A warm highly-protective, men's down jacket designed for mountain rescue use in extremely low temperatures.

Large, easy-access chest pocket to store tools in rescue situations.

Waterproof shell fabrics protect down from snow and rain. Primaloft® Silver at sections where the down needs to be protected from moisture.

Elasticated hem adjustment with cord locks. (06)

Helmet-compatible hood with hidden, zipped gusset and storm collar. It adjusts to give a precise, close-to-the-face fit, with or without a helmet. Height and volume adjustment ensure good protection, visibility and mobility at all times. (01)

Hand-warming, harness-compatible pockets to keep those fingers working. (04)

Two large inner mesh pockets to keep spare gloves, hats warm/ dry them next to body and store ski skins, etc. (07)

Velcro-adjustable cuffs with gusset to fit with gloves.

1582 bergrot/0910*

Developed originally for alpine rescue work in extremely cold conditions, the *Rescue PTX/Down Jacket is a warm highly-protective, men's down jacket that is ideal for rescue operations and bivouacking or belaying during ice climbing in low temperatures.

Made from an abrasion-resistant bluesign® approved Powertex water-repellent shell fabric, we use an extra robust version at the shoulders, cuffs and lower hem to prevent wear from a pack or harness. It has a high-quality 90/10 down fill with Primaloft® Silver inserts at the shoulders, cuffs and lower hem to ensure insulation even when wet and prevent cold bridging.

The *Rescue PTX/Down Jacket is a secure bastion on colder days in the mountains. Its 3D down box chamber construction has a 90/10, 750 cuin, 245g down fill (size 50/L) that provides reliable insulation, while its free motion patterning prevents hem-lift when climbing. And the padded helmet-compatible hood has a zipped gusset which makes it neater and more compact when closed, yet larger with 10% more volume (compared to standard helmet compatible hood constructions) and freedom of movement when open. In addition, it can be adjusted to ensure a comfortable fit whether you're wearing a helmet or not. Compression stow bag provided. This product is an ISPO Award winner.

A windproof, water-repellent insulated jacket for men with PrimaLoft® synthetic insulation - a warm, protective mid or outer layer for alpine mountaineering.

1581 bergrot/0910

Designed specifically for 3-season alpine rescue work, the Rescue PrimaLoft® Insulation Jacket is a warm, windproof and water-repellent jacket. Its highly breathable and quick-drying PrimaLoft® Silver synthetic insulation keeps you warm even when wet, while the lightweight, yet durable Pertex® Quantum bluesign® approved double ripstop nylon outer fabric is ideal for alpine use. We use our proprietary waterproof and windproof 2-layer Powertex membrane fabric at the shoulders, cuff and lower hem for extra protection at these critical wear points.

Developed together with the Rescue Team South Tyrol, it's designed to provide professional-grade insulation and functionality for rescue operations and activities such as alpine mountaineering, ski mountaineering, glacier mountaineering and ice climbing.

The Rescue PrimaLoft® Insulation Jacket features SALEWA's Free Motion patterning to prevent hem-lift while climbing - so it can be worn alone as a warm outer layer or as an insulating mid piece under an outer shell. Designed according to SALEWA's body mapping system, it uses targeted PrimaLoft® Silver insulation, 100g and 80g (sleeves and lower torso), to provide the right amount of warmth at different parts of the body. In addition, it packs down small to save space in your backpack. All pockets are positioned to allow easy access when wearing a harness or pack.

A windproof, water-repellent insulated jacket for men with TirolWool® - a warm, protective mid or outer layer for alpine mountaineering.

The Rescue Hybrid Tirol Wool Jacket is a lightweight, windproof and water-repellent jacket. Designed according to SALEWA's body mapping system, it has TirolWool® 60g insulation that provides the right amount of warmth at different parts of the body, while the lightweight, yet durable ripstop polyamide outer fabric is ideal for alpine use.

Developed together with the Rescue Team Tyrol, it's designed to provide professional-grade insulation and functionality for rescue operations and activities such as alpine mountaineering, ski mountaineering, glacier mountaineering and ice climbing. TirolWool® is sourced from Tyrolean mountain sheep whose fine white fleece is well known for its outstanding warmth, breathability and thermo regulation. By using TirolWool®, SALEWA is supporting the traditional, regional wool industry.

The Rescue Hybrid TirolWool Jacket features SALEWA's Free Motion patterning to prevent hem-lift while climbing and it can be worn alone as a hybrid outer layer or as an insulating mid piece under an outer shell that packs down small to save space in your pack. TirolWool® is sourced from Tyrolean mountain sheep - the mountain environment produces a wool with higher insulation and excellent thermo-regulating properties. Thanks to a special Oxy-wash treatment the wool is soft, chlorine free, washable, odourless and breathable. In addition, this jacket also stores away into its own inner pocket, to pack down small in your pack."

Hand-warming pockets to keep those fingers working, positioned to allow easy access when wearing a harness. (04)

1581 bergrot/0910

The Rescue Tirol Wool Vest is a windproof and water-repellent vest. Its breathable, quick-drying and thermo-regulating TirolWool® 60g insulation keeps you warm even when wet, while the lightweight, yet durable double ripstop nylon outer fabric is ideal for alpine use.

Developed together with Tyrolean mountain guides and rescue organisations, it's designed to provide professional-grade insulation and functional performance for rescue operations and activities such as alpine mountaineering, ski mountaineering, glacier mountaineering and ice climbing.

TirolWool® is sourced from Tyrolean mountain sheep whose fine white fleece is well known for its outstanding warmth, breathability and thermo regulation. By using TirolWool®, SALEWA is supporting the traditional, regional wool industry.

The Rescue Tirol Wool Vest can be worn alone on mild-weather days or as an insulating mid layer under an outer shell. Alternatively, it packs down small to serve as an extra layer during colder days. TirolWool® is sourced from Tyrolean mountain sheep - the harsh mountain environment produces a wool with higher insulation properties. Thanks to a special Oxy-wash treatment the wool is soft, chlorine free, washable, odourless and breathable. In addition, this vest stores away in its own inner pocket, to pack down small in your pack.

Abrasion-resistant, weather-repellent, breathable fleece with 4-way stretch performance. Made of Polartec® Thermal Pro® fleece with Hardface® Technology for additional durable water repellency and durability.

Professional-grade, abrasion-resistant, weather-repellent insulation with 4-way stretch performance. This item was a specific development based on the collaboration with the South Tyrolean Rescuers. Our Rescue PTC Full Zip Fleece is made of Polartec® Thermal Pro® fleece with Hardface® Technology which provides greater performance than conventional fleece without restricting mobility, breathability or comfort. The outer surface has a special application. Fusing a polymer to the surface of the fleece makes it hard and smooth yet flexible, i.e. significantly more abrasion resistant, wind resistant and water repellent.

On the reverse side, the microgrid waffle construction fleece traps more air for greater warmth. It stays dry, breathable and comfortable by continuously transferring moisture vapour to the outside for rapid evaporation during strenuous rescue work. And the smooth surface makes for easy layering. Additional details: soft inner collar and ergonomically shaped sleeves.

The two chest pockets are positioned to allow easy access when wearing a harness or pack, while the bonded sleeve pocket is ideal for carrying small tools.

The Rescue GTX Pro Pant is our lightweight, durable, waterproof, windproof and breathable shell pant made of tough 3L GORE-TEX® Pro fabric. It has long, waterproof 3-way zips for ventilation, integrated gaiters and reinforced cuffs for protection from ski edges or crampons. In addition, the cuffs have hem hooks and loops for attachment to mountaineering boots or ski boots. Developed together with the Tyrol and South Tyrol Mountain Rescue Team, this pant is built to provide full protection for long hours of rescue work in the worst conditions.

Windproof, breathable and water-repellent men's softshell mountaineering and ski touring pants.

Braces attachment option for better protection during bad weather.

Adjustable ergonomic waist. (01)

Knee protection (3L GORE® WINDSTOPPER®) for kneeling when working.

Zipped tool pockets at upper front leg for easy access and safe storage during rescue work.

Reinforced lower inner leg for ski and crampon durability.

Adjustable side zipper at hem and integrated, elasticated cuff adjustment adapt to ski-touring or mountain boots. (03)

0910 black

Developed together with the Tyrol and South Tyrol Mountain Rescue Team, our Rescue Hybrid Windstopper Pant is a windproof, breathable and water-repellent softshell pant with ventilation zips at the sides as well as ankle zips. For its hybrid design, we use GORE® WINDSTOPPER® inserts at targeted areas - the front knees and seat where windproof protection is required - and lightweight, abrasion-resistant softshell at the bottom leg and waistband. Ergonomic pre-shaped knees and 4-way stretch performance make it well suited to dynamic activities such as ski touring, where flexibility is required. The cuffs are Kevlar-reinforced to prevent damage from ski edges or crampons and they feature internal hooks and loops for attachment to footwear or ski boots.

Developed together with the Rescue Team Tyrol, the Rescue Pant is a lightweight, wind-resistant, abrasion-resistant and breathable men's softshell pant for alpine climbing and summer rescue work. Its fabric has good wicking performance to keep you dry during strenuous activity. Featuring pre-shaped knees and 2-way stretch for good mobility, as well as stretch inserts at the waist. With UPF 50+, they also provide good protection from the strong mountain sun. Designed in a slim fit for 3-season use, from mild spring to late autumn.

GORE-TEX[®] Pro

WATER COLUMN: 28 000 mm
BREATHABILITY: <6 RET

Garments made with **GORE-TEX[®] Pro** product technology are durably waterproof, windproof and extremely breathable. Their high performing membrane and robust face fabrics are rugged and hard-wearing. GORE-TEX[®] Pro is ideal for extended mountaineering use in extreme weather.

GORE-TEX[®] Pro fabric's construction keeps your body dry by reducing the accumulation of sweat, so you remain cool during aerobic activities and warm during rest breaks and after activity has ceased. Made to meet the high demands of (ski)mountaineers, freeriders, mountain guides and serious outdoor enthusiasts, garments made with 3-layer GORE-TEX[®] Pro fabric are engineered with added durability to withstand abrasion in rugged environments while protecting against extreme and unpredictable conditions with frequent work-rest cycles.

GORE-TEX[®] Pro products for mountain sport activities use a 100 % eP-TFE-based multilayer membrane system with a unique microstructure. The membrane is durably bonded to both the outer material and a specially developed robust inner lining. Outer materials have to meet strict performance criteria (denier ≥40) and are given a thin, low denier Gore Micro Grid Backer technology which enhances breathability and reduces weight.

BENEFITS:

- durably waterproof and windproof
- breathable
- extremely rugged and durable

POWERTEX CORDURA[®] is a strong and light, rugged and hardwearing waterproof fabric with durable, long-lasting performance for technical outerwear and shell fabrics. This makes it ideal for activities such as ski mountaineering.

POWERTEX[®] is SALEWA's proprietary family of breathable, waterproof and windproof shell fabrics with a water-repellent finish. POWERTEX CORDURA[®] is Salewa's lightest **POWERTEX[®]** 2.5-layer shell fabric. It provides durable, long lasting performance. It is made with INVISTA qualifying full dull lustre yarns that offer enhanced tear and abrasion resistance. In addition, its elastane content allows extra freedom of movement.

POWERTEX CORDURA[®] is made of 94% nylon CORDURA[®], 6% elastane and has a PFC-free DWR finish.

BENEFITS:

- waterproof (10,000 mm) 2.5-layer construction
- windproof
- breathable (10,000 g/m²/24h)
- strong and light
- freedom of movement, due to 6% elastane content
- durable, long-lasting performance
- good strength-to-weight ratio, due to CORDURA[®]
- tear-resistant
- abrasion-resistant
- high tenacity nylon yarns
- natural matt appearance
- PFC-free

DURASTRETCH

DURASTRETCH is our proprietary abrasion-resistant fabric. We use it to make our hard-wearing jackets and gilets, pants and shorts, reinforcing knee and side inserts and gloves for alpine climbing, trekking and hiking. It's also lightweight and surprisingly comfortable.

DURASTRETCH fabrics are constructed of nylon (polyamide) with a high stretch content. They are lightweight, comfortable yet hardwearing and highly abrasion-resistant.

DURASTRETCH is available in a wide range of 2-way stretch and 4-way stretch versions. It is breathable and can be treated with a DWR finish to make it water-repellent. Most of the DURASTRETCH fabrics we use in this collection are suitable for four-season use as their inner structure quickly wicks sweat away.

DURASTRETCH fabrics make high-quality mountaineering apparel.

High-performance **DOWN** is a fill and insulation material. We use it in our apparel and sleeping bags.

DOWN is an astonishing natural material. It has an excellent warmth-to-weight ratio, a high level of heat retention and a small, compressible pack size. No other material combines such low weight with such high thermal insulation. High-quality DOWN has decisive advantages over synthetic fill materials.

DOWN is a by-product of the food & meat industry where waterfowl (ducks and geese) are raised for meat or eggs.

SALEWA only uses Responsible Down Standard (RDS) down. For more information about RDS certification, please see page 160.

BENEFITS:

- excellent warmth-to-weight ratio
- high heat retention
- packable
- lightweight
- 100% RDS down

PRIMALOFT® is the benchmark in performance of all synthetic insulations. It provides warmth without bulk, is water-resistant, breathable, highly compressible. Moreover, it is very light and has an exceptional feel. PRIMALOFT® keeps you warm, even when wet.

ENGINEERED FOR SUPERIOR PERFORMANCE

Four key features that differentiate PRIMALOFT® from all other synthetic insulations:

WARMER: proprietary blend of small diameter fibres trap more air to insulate

DRIER: special finishes and small diameter fibres make PRIMALOFT® insulation water-resistant

SOFTER: Finer diameter fibres and proprietary finish make PRIMALOFT® insulation ultra soft

MORE COMPRESSIBLE: Smaller diameter fibres allow PRIMALOFT® insulation to compress into a smaller space

PRIMALOFT® SILVER

A high-performance insulation with the full spectrum of features to brave the elements.

Used in a wide range of SALEWA products, PRIMALOFT® Silver Insulation offers a synergy of the excellent warmth, softness and comfort that PRIMALOFT® products are known for. PRIMALOFT® Silver absorbs less moisture from the start so you stay drier and warmer. In addition, it encourages the passage of moisture vapour to keep you from being cold or clammy. And it provides warmth without weight that packs down easily for stashing in small places.

BENEFITS:

- warmth without bulk
- water and wind resistant
- warm when wet and fast drying
- highly compressible
- breathable
- lightweight
- packable (compresses like down)
- superior softness

TIROLWOOL® is made from mountain sheep raised in the South Tyrol region. Their wool has been used to make warm clothing for centuries, as worn by the early pioneers of alpinism. Tyrolean mountain sheep live at 2,000 metres all-year round in harsh conditions where normal sheep could not survive. Their fine white fleece is well known for its outstanding warmth, breathability, thermo regulation and insulation even when wet.

Mountain rescue professionals say they prefer wool clothing because of its functional properties and comfort for the extreme temperature differences and long hours involved during high-alpine work.

By choosing to source local Tyrolean wool, SALEWA is sustainably reducing transportation - a major contributor of carbon dioxide and other greenhouse gas emissions that impact on the climate. In addition, local sourcing supports mountain sheep farmers and the regional economy.

TIROLWOOL® offers natural insulation and keeps the skin warm and dry by absorbing moisture vapour and transforming it into heat. It also reduces moisture accumulation and increases moisture transmission in cold conditions, preventing overchilling.

TIROLWOOL® is made using an eco-friendly oxy-wash that is chlorine free: wastewater from the wool-chlorination process contains high concentrations of chlorinated chemicals. In addition, the oxy-wash process makes the wool fibres soft, odourless, hygroscopic and breathable. These characteristics remain unchanged after washing.

BENEFITS:

- outstanding warmth, breathability, thermo regulation and insulation even when wet
- soft and comfortable
- natural and biodegradable
- renewable, sustainable material sourced from local sheep
- chlorine free
- naturally odour resistant

POLARTEC® **THERMAL PRO**® fabrics are the most technically advanced of the **POLARTEC**® insulation fabrics. They come in a variety of unique surface textures and performance-enhancing patterns. The high loft versions offer the highest warmth to weight ratios of all fabrics **POLARTEC**® offers.

POLARTEC® **THERMAL PRO**® fleece is ideal for cold weather use.

POLARTEC® **THERMAL PRO**® fleece has a 100% polyester velour, pebbled, or shearing surface that creates air pockets that trap air and retain body heat, providing outstanding warmth without weight. It also offers excellent breathability and dries quickly.

POLARTEC® **HARDFACE**® **TECHNOLOGY** is a new surface-fusion polymer application. It can be added to almost any fabric to bond it. Fusing a polymer to the surface of the fleece creates a hard, smooth yet flexible surface that is significantly more abrasion resistant, snag/pick resistant, wind resistant and water repellent. As such, it is ideal for garments used as a shell or outer layer. In addition, it improves durable water repellency, while maintaining breathability. And by reducing friction between layers, it makes for easier layering without restricting mobility. Fleece garments with **HARDFACE**® **TECHNOLOGY** retain a more uniform appearance even after heavy use and frequent washing compared to other fleece fabrics.

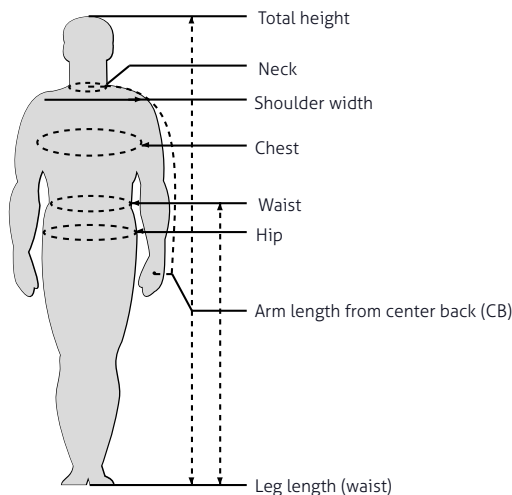

Our styles made of **POLARTEC**® **THERMAL PRO**® WITH **HARDFACE**® **TECHNOLOGY** have an abrasion-resistant, durable water repellent finish that sheds light rain and snow.

The version we use is 100% recycled.

BENEFITS:

- warmth without weight
- low bulk
- highly breathable
- fast drying
- improved durable water repellency
- durable
- reduced friction between layers
- easy care

SIZING CHARTS

All of our fits are developed considering our body measurement chart and the end use of the garment within a layering system.
